

Online Master Black Belt

Flexible one-to-one support

If you are involved in Lean Six Sigma, you need to get projects progressed quickly and efficiently to realise the financial benefits. But sometimes project progress can be hindered by a lack of experienced support, and hiring a consultant for a day can work out expensive and even introduce further delay when all that's needed is advice.

SigmaPro's Online Master Black Belt service allows you to get expert support when you need it, all from your desktop, with no daily rates or travel involved. Using a secure web conferencing facility, a SigmaPro Master Black Belt will be able to help diagnose your current situation, and provide expert advice fast. The facility provides audio and video, allows joint access to data and software, with shared whiteboards allowing you to sketch out ideas and develop solutions together. Your Master Black Belt can demonstrate on screen how to analyse data in Minitab, and even coach you to do it yourself all from your own desktop.

For private one-to-one classes, this unique coaching and mentoring service offers you the opportunity to ask one of our Master Black Belts anything you want. You choose the topic and we'll provide support. All you need is a computer and a telephone.

Whether you're new to Lean Six Sigma or an experienced practitioner, let one of our Certified Master Black Belts help resolve your questions and get your projects back on track via our secure on-line web conferencing facility.

Benefits of Master Black Belt Online

- ✓ Convenience - access this service from your own office or premises
- ✓ Save time – no travel involved, you connect with your Master Black Belt at your desk
- ✓ Excellent value for money – you only pay for your time on-line
- ✓ Regular mentoring – the option to schedule a monthly call to your Master Black Belt

Who is this service for?

All people interested or involved in Lean Six Sigma, from beginners to experienced practitioners.

“An extensive knowledge of Lean and Six Sigma, as well as great insight in how to apply it in the ‘real world’. All of this is available on your desktop. On-line mentoring is excellent, and so convenient.”

4. We confirm your appointment and send you an invite via email
5. Add any advance information you would like to your online folder before the session
6. On your appointment online session click the Invite link in the email and sign-up for the session using the credentials provided
7. Enjoy your session with our Master Black Belt

To get the most out of your session please let us know what you would like to discuss 24 hours before your appointment.

Our Master Black Belts

SigmaPro Master Black Belts are highly experienced and have worked in both manufacturing and service industries. Their consulting and training experience has involved delivering training materials for Lean Six Sigma programmes for several high profile clients. Most importantly, our Master Black Belts have helped clients deliver multi-million pound improvement savings.

In addition, our Master Black Belts have added significant value to many Lean Six Sigma deployments by mentoring practitioners and accelerating projects through DMAIC and DfSS phases. They have taught Lean / DMAIC and DfSS methodologies to hundreds of executives, Black Belts and Green Belts across the World.

“The arrangement worked well. Holding the meeting online enabled both parties to save a lot of time on the day. It is particularly valuable for reviewing project work and documents on screen in real time, and this makes the Online Master Black Belt service invaluable.”
